

SCREW FEEDERS FOR GRANULATED MATERIALS G SERIES

The G Series screw feeders are used for the loss-in-weight feeding of granular shaped bulk materials. The composition of the various sizes and the flexibility of each component create the possibility of having compact feeding units that are easy to use. The ease with which they can be dismantled makes faster the cleaning and the screw replacement.

TECHNICAL CHARACTERISTICS

CHARACTERISTICS	STANDARD	ON REQUEST
Body Material	aluminium	
Screw material	Carbon steel	
Connections	Fast unlock	Knobs Hooks
Connection to the structure	N°2 saddles + bolts	Side brackets on the hopper
Screw	See specific document	
Outlet	Horizontal Flanged	Vertical Cylindric
Adapter	Endless screw	
Loss in weight system	n°1 off-center load cell
